

Title: Diabetes Overview

What is Diabetes?

Diabetes is a chronic medical condition where blood sugar levels become too high because the body cannot produce or use insulin properly.

Types of Diabetes:

- Type 1 Diabetes: Body does not produce insulin
- Type 2 Diabetes: Body becomes resistant to insulin
- Gestational Diabetes: Occurs during pregnancy

Symptoms:

- Increased thirst
- Frequent urination
- Fatigue
- Blurred vision
- Slow healing wounds

Causes:

- Genetics
- Obesity
- Poor diet
- Lack of exercise

Management:

- Healthy diet
- Regular exercise
- Blood sugar monitoring
- Medications (as prescribed by doctor)
